Mrs. Harris not only helped me understand Geometry concepts I struggled with, but also helped build my confidence in problem solving. She also helped reinforce to me the importance of showing my work.

- Mikaih

I was a student of Mrs. Harris 4 years at BAHA. I found myself needing extra help during both Algebra & Geometry classes and what a blessing it was to have that one on one time with her. The lack of distractions from others, as well as the weekly reinforcement from Mrs. Harris, allowed me the opportunity to be successful in both classes.
